

# Core Competencies in Practice

Friday May 18, 2018

Deeper Learning happens when students are challenged, engaged and empowered. The competencies of deeper learning align with the Core Competencies embedded in the BC Curriculum.

Through connecting our students with their skills in communication and thinking, and developing their personal and social awareness, educators support students as they face a world ever-changing in complexity.

The challenge today's educators face is how to embed this into the natural flow and culture of our classrooms.

How can Core Competencies be noticed, named and nurtured in our classrooms and in our work?

This full day workshop provides:

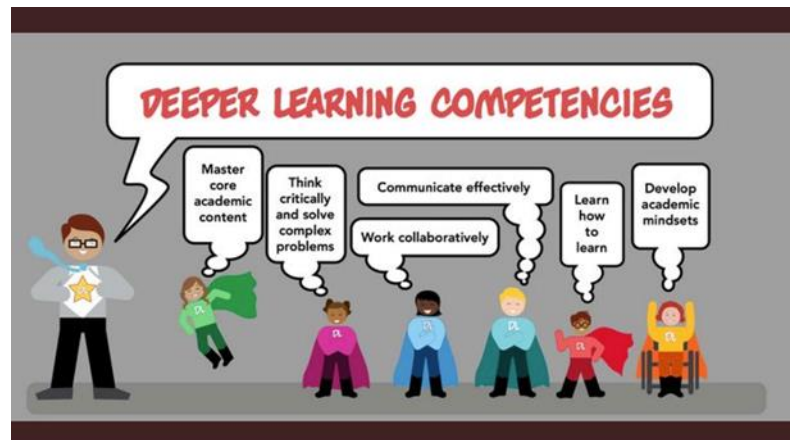

- A window into how some classrooms in SD73 highlight the Core Competencies
- A lesson on quality feedback by giving and receiving feedback
- An Ed Camp style approach to personal inquiry of the Core Competencies
- An opportunity to discuss and collaborate with colleagues

Lunch is provided

Cost:

SD73 Educators – Free

Educators from outside of SD73 - \$60

Registration:
